Regional Workshop on

Wastewater treatment and reuse for Metropolitan Regions and Small Cities in Developing Countries

September 11 – 17, 2016, Recife, Pernambuco, Brazil
Overview
Sustainable water management is essential for the social, economic and environmental growth of developing countries. Many of such countries presented a very high rate of population growth in the last century, resulting in fast urbanization, strengthened by the heavy migration from rural to the cities, either of big or small size. Water supply of good quality and adequate quantity, especially in countries with semi-arid regions, and appropriate sewerage systems and treatment of wastewaters impaired severe constraints for the population. Nevertheless, many alternatives for wastewater treatment were developed with the participation of universities and research institutes, as well as by practitioners. Substantial efforts have been directed towards the search of good alternatives for domestic sewage treatment in metropolitan regions and small cities in development countries, to comply with the particular economic and environmental conditions of them. The use of conventional treatment technology, as well as advanced alternatives for treatment and post-treatment of wastewater, including the questions of plant scale in centralized or decentralized systems and possible reuse of effluents, are aimed for presentation and discussion about theoretical and practical aspects.

Objectives
The workshop main objectives are: to share the experience, knowledge, research between the different partners, to discuss main problems and challenges in the field of wastewater treatment and reuse for Metropolitan Regions and Small Cities in Developing Countries, suitable technologies for domestic sewage treatment, removal of recalcitrant and micro-pollutants from domestic sewage and industrial wastewater and reuse of treated wastewater in urban areas, industry and agriculture. Also, the workshop aims to strengthen the expert network in the EXCEED-SWINDON project.

Topics
- Alternatives for domestic sewage treatment in metropolitan regions and small cities
- anaerobic processes for the treatment of domestic sewage and industrial wastewater
- stabilization ponds
- aerobic granular sludge
- post-treatment
- centralized and decentralized systems
- water reuse

Experts Participation
The workshop will have the participation of international level experts (research, practice and teaching) on wastewater treatment and reuse, with expertise covering the topics listed above. Some of the experts are:

a) TU Braunschweig / Institute of Sanitary and Environmental Engineering (Braunschweig, Germany): Prof. Dr.-Ing. Norbert Dichtl, Prof. Dr.-Ing Andreas Haarstrick and Prof. Dr.-Ing. Klaus Flicke.

b) Federal University of Pernambuco / Department of Civil and Environmental Engineering and Department of Geology (Recife, Brazil): Prof. Dr. Mario T. Kato, Prof. Dr. Lourdinha Florencio and Prof. Dr. Savia Gavazza.

c) Other Brazilian expert professionals in the field of wastewater treatment and reuse will be invited for the lectures and participation in the discussion in the workshop.
Structure of the workshop

Target Audience/Candidates:

The preferable participants are those from EXCEED-SWINDON partner countries engaged in research at post-graduation level (M.Sc and Ph.D), post-doc and young researchers or practitioners working in the field of wastewater treatment (urban and industrial) and reuse, either for metropolitan or small cities. APPLICANTS SHOULD PRESENT A CASE STUDY. The selection of applicants will be based on the quality of the case study.

Number of participants:

The maximum number of participants is limited to 30. Not exclusively, but the first priority will be given to the candidates from the EXCEED SWINDON partner universities. Nevertheless, all candidates will be selected according to the criteria established by the EXCEED SWINDON, as stated by the application item below.

Application:

Please apply online until April 30th, 2016.

http://www.exceed-swindon.org/apply under Workshop or Training Course

Selection and notification to the applicants until July 1st, 2016.
